PROFESSIONAL SUMMARY

Full-Stack Developer with professional experience developing and maintaining enterprise web applications using ASP.NET Core (.NET/C#), React, TypeScript, Entity Framework Core, and Microsoft SQL Server. Experienced in implementing new features, maintaining legacy systems, debugging production issues, and collaborating in Agile/Scrum teams. Passionate about building scalable, maintainable software and continuously improving development practices.

EXPERIENCE

Junior Developer II | SBC Simplified Systems | On-site | January 2026 – September 2026

- Develop and maintain backend APIs using ASP.NET Core (.NET/C#) with Entity Framework Core and LINQ against Microsoft SQL Server
- Build responsive front-end features with React and TypeScript, translating requirements into functional interfaces
- Maintain and enhance existing web applications, including legacy systems, debugging production issues across codebases
- Design and implement new features and data models following software development best practices
- Perform manual testing and follow Git workflow best practices, submitting clean Pull Requests and resolving merge conflicts
- Collaborate with developers, QA, and stakeholders across multiple concurrent projects
- Participate in Agile/Scrum ceremonies, including weekly sprint meetings to align on progress and priorities

Customer Service Representative | Afni | On-site | August 2025 - January 2026

- Provided phone-based customer support for activation and internet order services on a voice account
 - Followed established scripts and procedures to resolve customer inquiries and process orders accurately
 - Consistently met required KPI targets, qualifying for performance incentives
-
